

6010 Expert Seamless Thermal Base Layer LS

6011 Freedom Seamless Thermal Base Layer LS

SRP	69,95 €	99,95 €
Composition	Polypropylene 56 %, Polyamide 40 %, Elastane 4 %	Polypropylene 44 %, Polyamide 44 %, Elastane 12 %
Manufacturing technique	Circular-knit *see info text below	Warp-knit *see info text below
Available colours	black	black, red, blue, pink, navy
Available sizes	S/M, L/XL, XXL	S/M, L/XL
Weight	225 g (size XXL)	200 g (size L/XL)
Intended User	Performance cyclists	Leisure cyclists of any kind
Intended Use	Physical activities in mild to cold conditions	Physical activities in mild to cold conditions
Fit	Light Compression fit	Next to skin fit
Collar	Crew neck	Crew neck
Sleeve length	Long sleeve	Long sleeve
Features	<ul style="list-style-type: none"> • Long sleeve • Moisture wicking • Anti-odour • Insulating • Thermoactive • Strategically placed textures to optimize moisture transfer and insulation • Optimal temperature control • Seamless • Dermatologically tested • Dryan: bacteriostatic properties reduce smell, allows for easy care 	<ul style="list-style-type: none"> • Long sleeve • Moisture wicking • Anti-odour • Insulating • Adaptable fit • Freedom of movement • Being comfortable and functional dressed at the same time • Seamless • Based on high-tech knitting technology • Dermatologically tested • Dryan: bacteriostatic properties reduce smell, allows for easy care • Run proof properties

Information

Insulation and moisture transport: The personal experience may vary due to a variety of factors, like the type and number of layers worn over the base layer, the outside conditions, the intensity of the ride and the individual characteristics of our bodies during workouts.

Seamless: The **Expert** base layer is made with **circular knit** technology, so the body and arms are knitted separately, and the arms are stitched to the body. This is different from traditional cut & sew technique where the fabric is cut in various panels and stitched together to form the garment. The **Freedom** base layer is made with **warp knit** technology, where the whole garment is knit in one go.
